

# A complete safety solution

We've partnered with the National Center for Safety Initiatives (NCSI) to help organizations manage background screenings, stay in compliance with their governing programs, and limit liability with an easy-to-manage comprehensive safety program.

The National Center for Safety Initiatives (NCSI) delivers the “Gold Standard” in protecting athletes and organizations by thoroughly investigating all screening subjects through a variety of databases and search parameters.

## IDENTITY VERIFICATION/SOCIAL SECURITY VALIDATION

Confirms name and date of birth against the Social Security Number provided. This is used to help eliminate the possibility of false names and/or information. It also confirms current address and identities previous addresses. This is critical information used to determine the jurisdiction in which the background screening will be conducted.

## LOCAL CRIMINAL RECORD SEARCH

State and/or county criminal record searches are performed to source misdemeanor and felony records. Based on address history, multiple county searches may be performed. All of the county record searches are conducted directly with the county court.

## NATIONAL CRIMINAL SEARCH

Multi-jurisdictional criminal database searches covering 50 states plus, DC, Guam, and Puerto Rico with more than 500 million records and alias search.

## SEX OFFENDER REGISTRY

Conducts sex offender registry database searches of state/jurisdictions in the U.S. and territories, including DC, Guam, and Puerto Rico.

## INTERPOL, FBI MOST WANTED, FEDERAL SANCTIONS

Wanted foreign nationals, international sex offenders/trackers, all high-level criminal data provided by partner countries.

## DISCOUNT SCREENING SERVICES MAY BE MISSING CRUCIAL INFORMATION

From an internal case study, it was found that 46% of records sourced from county or local level searches would have been missed on database-only searches. This would have allowed individuals with felonies on their records to have slipped through the cracks.
